Manual Magnetic Blinds

Stylish and Sophisticated

Greenoak offers versatile, contemporary privacy and shading solutions.

Our totally cordless system is operated via sliding magnetic blocks. These simple-to-use and unobtrusive controls are located around the perimeter of the unit.

Contemporary and durable Venetian blinds are available with the full lifting operation happening in one slick and easy motion. The tilt function allows you to set the levels of vision and light to your specifications.

- Maintenance Free - hermetically sealed double-glazed panels protected from moisture, dust and damage.
- Available in sizes up to 2500mm high and 2000mm wide.
  (Please note, width and height restrictions can apply).
- Full range of glazing options including solar shading, low E, fire rated and noise reduction.
- Guide rails factory fitted for easy installation, and manufactured to the highest standard.
- Standard units are 28mm thick when glazed, with 4mm glass either side of the 20mm spacer bar.
- Available in 8 colours (see back page).
- Manufactured in accordance with all parts BSEN 1279 and have full CE accreditation.

Motorised-Battery Powered

Elegant and Effortless

Our wireless motorized blinds are controlled via a rechargeable lithium battery pack. This can be attached magnetically to either the glass surface or the frame.

With our sleek design, installation is quick and easy, with no electrician needed and no unsightly wires to spot. The blinds can be operated via buttons on the battery pack, or at a distance with a remote control.

For the ultimate in easy usability, the blinds can be controlled individually or in groups of up to 12.

- Maintenance Free - hermetically sealed double-glazed panels protected from moisture, dust and damage.
- Simple up/down button functionality. Holding the button operates the tilt.
- Choose from Venetian, pleated, Duet Filtering or Duet Darkening blinds. Available in 4 colours (see back page).
- Solar panels can be provided to extend battery power.
- Available in sizes up to 2800mm high and 2500mm wide.
  (Please note, width and height restrictions can apply).
- Full range of glazing options including solar shading, low E, fire rated and noise reduction.
- Standard units are 28mm thick when glazed, with 4mm glass either side of the 20mm spacer bar.

Motorised-Hard Wired

Sleek and State-of-the-art

Our motorised blinds are powered externally, with nothing to detract from the refined and contemporary finish.

Perfect for those with hi tech plans, these blinds can be activated by a switch, by remote control, or through a home automation interface. For the ultimate in privacy and shading choices, the blinds can be controlled individually or in groups of up to 12.

Each respective unit needs to be wired directly to the power source. Wireless contacts can be supplied when wiring through door and window frames.

- Maintenance Free - hermetically sealed double-glazed panels protected from moisture, dust and damage.
- Integrates easily with most major home automation interfaces (eg Lutron, Control 4, etc)
- Choose from Venetian, pleated, Duet Filtering or Duet Darkening blinds.
- Available in sizes up to 2800mm high and 2500mm wide.
  (Please note, width and height restrictions can apply).
- Full range of glazing options including solar shading, low E, fire rated and noise reduction.
- Standard units are 28mm thick when glazed, with 4mm glass either side of the 20mm spacer bar.
- Available in 4 colours (see back page).

Blackout Blinds

Introducing the
Blackout Blinds

an integral magnetic blind designed to block out 98% of light, perfect for dark rooms, bedrooms and other areas where near blackout may be needed.

A specially designed honeycomb curtain with a bespoke internal foil lining to limit the amount light passes that through is now available hermetically sealed within a standard 28mm thick double glazed unit.

Like our Venetian blinds, the blackout version uses a robust, smooth-to-operate magnet for easy operation, even on larger blinds.

- Maintenance Free - hermetically sealed double-glazed panels protected from moisture, dust and damage.
- Available in sizes up to 2999mm high and 1500mm wide.
  (Please note, width and height restrictions can apply).
- Full range of glazing options including solar shading, low E, fire rated and noise reduction.
- Standard units are 28mm thick when glazed, with 4mm glass either side of the 20mm spacer bar.
- Available in 3 colours: White (RAL 9016), Silver (RAL 7042 and Champagne (RAL7032) – and the frame/magnet is available in all standard magnetic colours.
